

Interactions between Algebra, Equivariance, and Homotopy Theory

June 24 - 28, 2024

Regensburg, Seminar Room M311

Speakers

Natàlia Castellana (Universitat Autònoma de Barcelona)
"Algebraic models for the
mod p homotopy type of classifying spaces"

John Greenlees (University of Warwick)
"Commutative algebra and
equivariant cohomology theories"

Srikanth Iyengar (University of Utah)
"Dualisable objects in local algebra
and modular representation theory"

Magdalena Kędziorek (Radboud University Nijmegen)
"Equivariant commutativity and norms"

Organizers

Luca Pol (University of Regensburg)
Jordan Williamson (Charles University Prague)
